### Key Notes

- **Total Phosphorus**: Approaching limit. Has the potential to cause algal blooms and excessive plant growth.
- **Round Lake**: Overall, the lake is in good health.

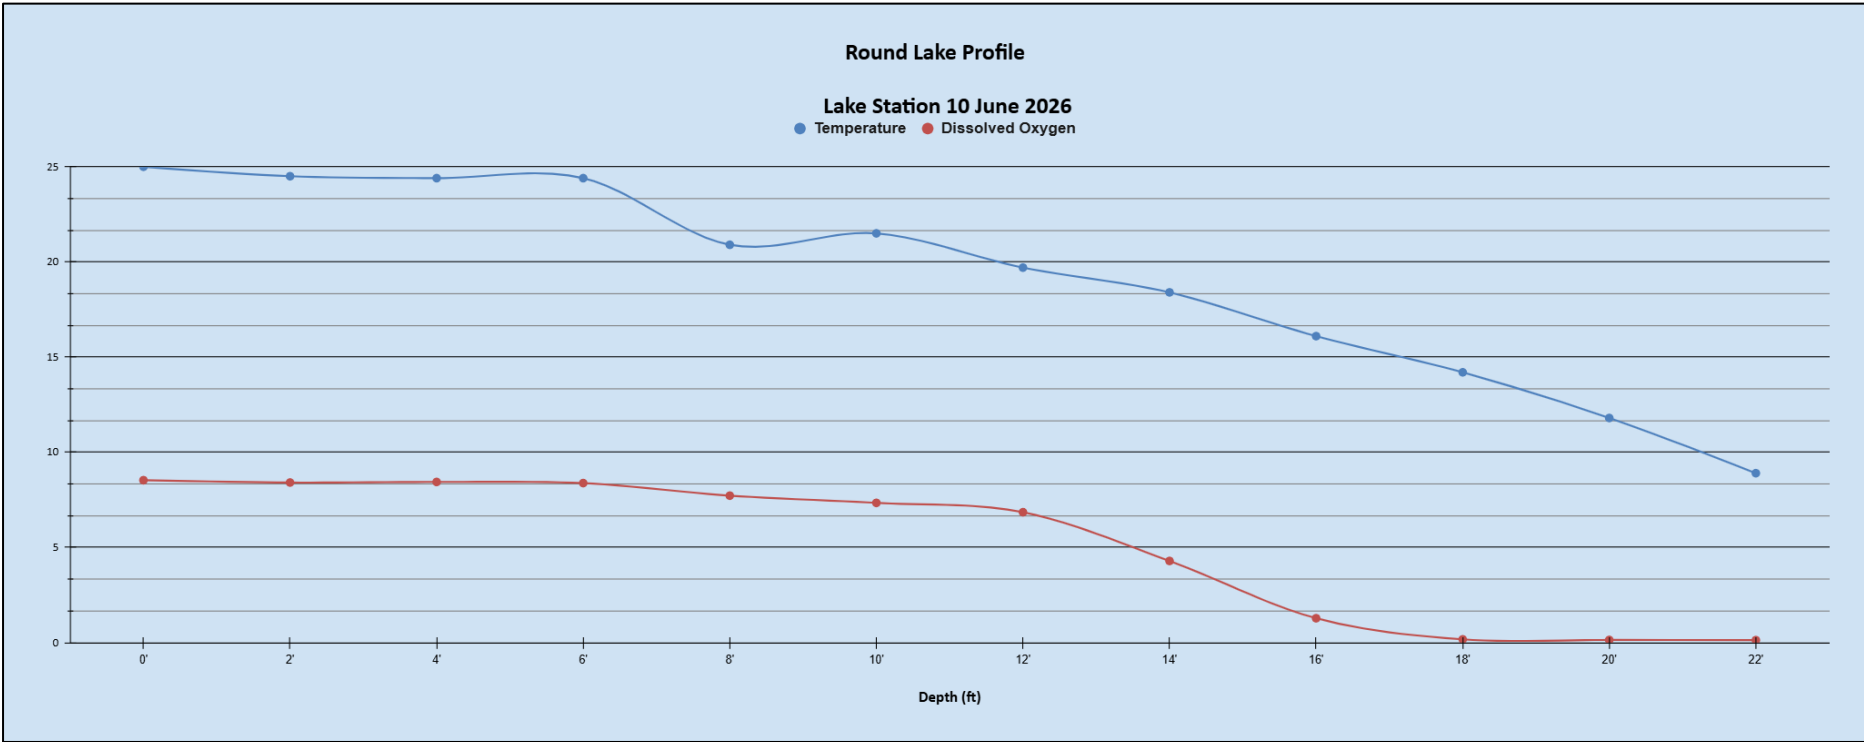

### Recommendations

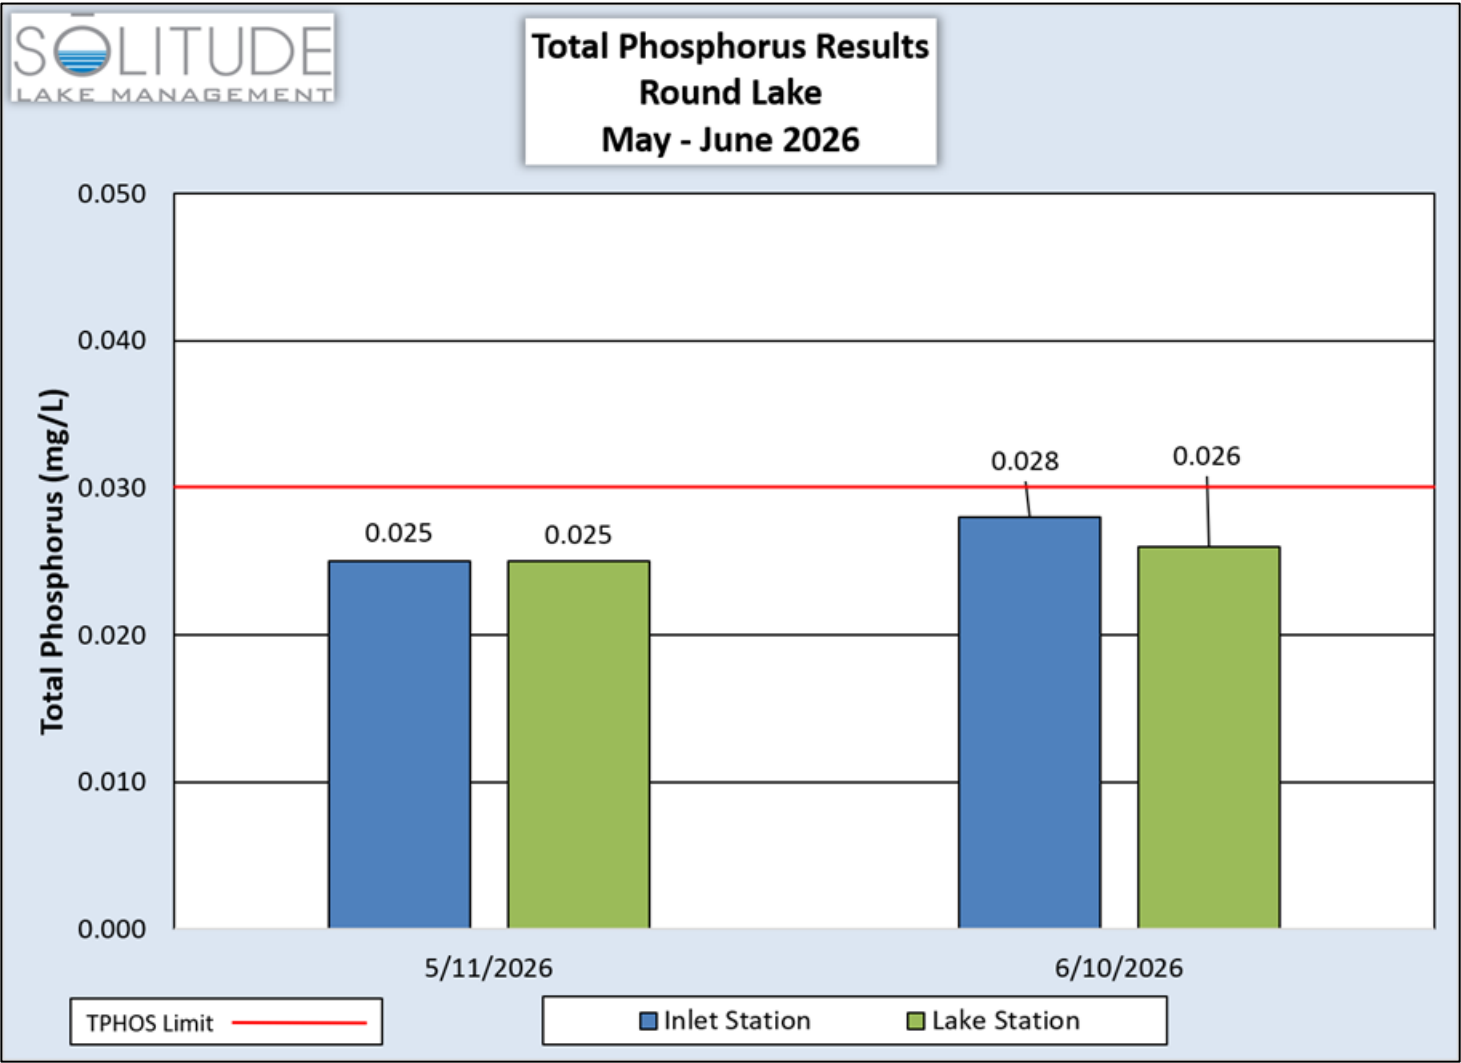

- Biofilm was present throughout the basin. Most likely caused by decaying pollen.
- The outlet at the boat launch reported dense amounts of invasive Eurasian watermilfoil and benthic filamentous algae. Moderate amounts of floating filamentous algae was observed. Sparse amounts of common waterweed, pickerelweed and coontail was documented. Trace amounts of white water lily and invasive water chestnut were also observed.
- The Wetlands support sparse to moderate amounts of spatterdock, floating filamentous algae, and invasive curly-leaf pondweed. Moderate amounts of coontail were documented along with sparse amounts of common waterweed. Trace amounts of white water lily, great duckweed, and invasive water chestnut were also recorded.
- A **Nutrient Reduction Treatment** to reduce total phosphorus levels and decrease photosynthetic growth.
- An **Algal Treatment** to reduce the amount of floating mats in the basin.
- Recurring **Monitoring** to record any change in water quality.

**Collection Date: 10 June 2026    Examination Date: 11 June 2026**

Since the last sampling event, algal diversity decreased at both sampling stations but continues to be moderate. Algal density increased at the Inlet Station while the Lake Station decreased. Density is now considered moderate at the Inlet Station while the Lake Station is now low. The assemblage for both sampling sites continues to be dominated by green algae. Moderate amounts of diatoms were also observed in both samples. Trace amounts of euglenoids were only reported in the Lake Station sample. Water clarity increased at both sampling site during the June visit. Clarity continues to be fair at the Inlet Station while the Lake Station is now excellent.

**Glossary**

Water Quality Parameter	Desired Range	Limit	What is Measured	How it Works
Temperature	5° - 30°C	NA	Temperature at the surface. The profile measures throughout the water column.	Naturally fluctuates with the seasons. Thermal shock (when temperature changes rapidly in a short amount of time) can stress aquatic species.
Dissolved Oxygen	5.5 - 15 mg/L	<4.0 mg/L	Oxygen gas dissolved in the water.	Essential for fish and other aquatic species. O <sub>2</sub> is added to the water via wind, photosynthesis, or aeration unit. Low DO leads to fish kills and foul odors.
pH	6.5 - 8.5 SU	>10 SU	Acidity of the waterbody.	Varies depending on the soil and bedrock. It can also be influenced by many outside factors. Aquatic species can only survive within their natural range.
Alkalinity	60 - 200 mg/L	>200 mg/L	The waterbody's ability to neutralize acids.	Carbon neutralizes acids. It often occurs in limestone, dolomite, and calcite. These minerals are found in the soil and bedrock of a waterbody.
Total Hardness	60 - 180 mg/L	>200 mg/L	Calcium and magnesium in the waterbody.	Calcium and magnesium are key nutrients of an aquatic ecosystem. Calcium is especially important for snails and mussels.
Secchi	4.0 – 9.0 ft	<3.0 feet	Water clarity.	Water clarity varies depending on many factors. Low clarity is often caused by increased algae growth, kicked up sediment, or shoreline erosion.
Total Phosphorus	0.01 – 0.03 mg/L	>0.03 mg/L	Major nutrient needed for plant and algae growth.	Phosphorus is a limiting nutrient. This means if there is too much, it can cause exponential growth. If there is too little, very little growth will occur. It is often introduced via rain runoff from lawns and farm fields.
Ammonia	0.01 – 0.3 mg/L	>0.3 mg/L	Combination of nitrogen and hydrogen.	Produced from the degradation of organic matter. High levels can be toxic to many aquatic species and sometimes humans. High levels can also indicate pollution or a lack of oxygen.
Nitrate/Nitrite/Nitrogen	0.01 – 0.3 mg/L	>0.3 mg/L	Another nutrient needed for plant growth.	Nitrate is usable for plants. Nitrite can be toxic in large amounts but often converts to nitrate in the presence of oxygen.
Conductivity	160 – 1000 umhos/cm	>1500 umhos/cm	Electrical current that passes through the waterbody.	The ions that carry electricity are produced by dissolved solids such as chloride, nitrate, phosphate, sodium, magnesium, calcium, and iron.

Water Quality Parameter	Desired Range	Limit	What is Measured	How it Works
Carbon Dioxide	30 – 80 mg/L	>100 mg/L	Dissolved CO <sub>2</sub> gas.	CO <sub>2</sub> is used in photosynthesis for both aquatic plants and algae. High levels can be a sign of pollution or low plant/algae abundance. High levels can also lead to fish kills.
Fecal Coliform	0 – 170 CFU/100 mL	>200 CFU/100 mL	Subset of coliform bacteria.	A wide range of bacteria that can cause human illness and is often found in natural water bodies.

^The above thresholds are general goals that have been determined by decades of lake management experience from our lake management team and a variety of peer reviewed journal studies.

### 3.10. Food Truck Festival

Supervisor Richardson explains the 2026 Food Truck Festival, although there was a lot of positive feedback for vendors to attend, had to be canceled due to budgetary constraints. The cost for the bands, employee overtime, closing down O & R Rd, along with the County distribution issues that's going on. There was a dj booked but felt it was a disservice and, unfortunately, the dj couldn't attend this date. Instead of doing it this way, the Town Board conferred and decided to do it somewhere like Museum Village, where we don't have to shut down the road and pay a better homage to the Food Truck Festival than doing it at a discounted price. Our mortgage tax distribution came in dangerously low this year. We get it in two lump sum payments and typically our up-top payments is much larger, split in half, we did not see the revenue return. In this economy, basically no one is buying homes and that's a big chunk of the Town's revenue. So, we got together and basically expressed interest in allocating the celebration money to the July 4th Firework Festival. Moving forward having the Food Truck Festival once a year, based on attendance dropping in the last few years. Thank you to all the food trucks and vendors who volunteered for the Festival.

### 3.11. Dog Shelter IMA

Supervisor Richardson speaks regarding the Woodbury Dog Shelter IMA. If anyone in the public is told that we do not have a contract with Woodbury, that is misinformation. Our contract was signed in 2025 for a contract period of Jan 1, 2025 through Dec 31, 2025 but it has an automatic renewal clause for a period of one year unless there was notice given.

### 3.12. PFK O'Connor Davies Town of Monroe Audit

Supervisor Richardson speaks regarding PFK O'Connor Davies auditing. The recommendations being with capital planning, fund balancing policy.

BE IT RESOLVED that the Town Board of the Town of Monroe Made a Motion to Set the Public Hearing RE the Consideration of Highway Improvements to Seven Springs Road Pursuant to NYS Town Law 200 on July 13, 2026, at 7:00pm. (Supervisor Richardson did not make a Motion to Keep open the Public Hearing as it was rescheduled for July 13, 2026).

**Nays: None**

**Abstain: None**

-Supervisor Richardson: Okay, Darius, what do we have to do for the public hearing for Seven Springs? Basically, it got thrown out of whack because of the shift in meeting schedule, because of the audit and early voting. So, how do we handle this?

-Town Attorney Darius Chafizadeh: Correct. The town law for this road issue requires certain timings. So, we have to schedule for the next meeting. I think it's July 13th, if I'm correct.

-Supervisor Richardson: Yes. It's the next Monday after the Independence Day break.

-Town Attorney Darius Chafizadeh: So, if we could schedule that today for July 13th, we'll get all the notices with the applicant properly posted and properly sent to the newspaper, etc.

-Supervisor Richardson: Okay. So, I will make a motion be it resolved that the Town Board of the Town of Monroe makes a motion to open the public hearing regarding the consideration of highway improvements to Seven Springs Road pursuant to New York State town law 200.

-Supervisor Richardson: I'm sorry, I should have included that is. Should I just make a separate motion or can I tag on?

-Town Attorney Darius Chafizadeh: To do what? I'm sorry.

-Supervisor Richardson: I'm just like I basically made a motion. I don't know if your transmission from your office didn't have a date provided in it or the paper that I read just doesn't have the public hearing date in it. Let me see.

-Town Attorney Darius Chafizadeh: For July 13th.

-Supervisor Richardson: Let's redo that.

-Town Attorney Darius Chafizadeh: The other one had July 1st, so July 13th.

**RE: Proposal for Phase 1 Hydrogeological Consulting Services  
Town of Monroe**

Dear Mr. Mullarkey:

Hanson Van Vleet, PLLC (HVV) is pleased to submit this proposal to provide hydrogeologic consulting services in support of the groundwater supply requirements for the Town of Monroe, New York. The objective of this project will be to locate and develop a groundwater supply source capable of becoming a drinking water source for the Town, while complying with New York State Department of Environmental Conservation (NYSDEC) and Department of Health (NYSDOH) requirements. Currently the Town of Monroe purchases its drinking water from the Village of Monroe. The Town has received an Administrative Order from the USEPA regarding compliance with TTHM's. The Town would like to investigate the option of drilling its own wells versus treatment of the Village water.

The Town presently owns a 42-acre site off of Rye Hill Road. This site will be given a priority review to determine its ability to provide the required ground water supply.

The objective of this phase of work will be to evaluate and determine target areas for groundwater exploration. The specific objectives of this work are divided into the following six tasks:

- Task 1:** Perform a detailed literature search to identify the geologic and hydrologic conditions of the study area and determine the potential for development of a water supply.
- Task 2:** Review available previous investigation and engineer's reports, if available.
- Task 3:** Perform a review of NYSDEC and US EPA records to determine if there are any potential contaminant sources that could impact the development of a groundwater source in the Town.
- Task 4:** Perform a site visit to evaluate the on-site geologic and hydrogeologic conditions of the target areas and to locate potential sources of contamination.
- Task 5:** Conduct interviews with the local well drillers.
- Task 6:** Prepare a letter report summarizing the results of the investigation.

A more detailed description of each proposed task is provided below:

**Task 1: Literature and Data Review**

The objective of this task will be to perform a detailed literature search to identify the geologic and hydrogeologic conditions within the study area, with specific emphasis on the potential for groundwater supply development. The literature search will include the review of all available drilling logs or records, topographic maps, aerial photographs, local well drilling firm records, U.S. Geological Survey data and publications, New York State Geological Survey data and publications, New York State Department of Transportation (DOT), New York State Department of Environmental Conservation (NYSDEC), Division of Water well records, and any applicable HVV file data.

**Task 2: Review of Available Reports**

HVV will review all available reports compiled within the Town. These include geologic reports, engineering reports, maps, pumping test data, water quality data and drilling logs (if available).

**Task 3: NYSDEC Records Review**

This task will include a comprehensive review of the existing NYSDEC records with respect to petroleum or other types of contamination within the study area. The review of NYSDEC records will also involve contacting the appropriate NYSDEC person(s) in charge of the spill(s) within the Town. If necessary, a FOIL request may have to be initiated with NYSDEC.

**Task 4: Field Inspection**

HVV will perform field reconnaissance to verify the geologic and hydrogeologic features and conditions identified during Tasks 1 through 3. Potential wetlands and physical access issues will be evaluated. Potential exploratory test locations will be evaluated. HVV will also perform a preliminary review of other areas within the study area that may be potential sites for further investigation with respect to development of a groundwater source.

**Task 5: Interviews**

Interviews with the local well drillers will be conducted. Any well logs which they may have will be reviewed.

**Task 6: Well Site Screening Report**

A report will be prepared that will include all data compiled and reviewed during the previous tasks. The site will be evaluated to determine if the target areas can be developed in compliance with the present NYSDEC and NYSDOH regulations. The aquifer will be evaluated to determine if the potential exists for the installation of production wells that meet all setback and GWUDI requirements. Potential water quality concerns will be evaluated. The report will provide recommendations on the suitability of the target areas for groundwater resource development. The report will also make recommendations on the next phase of work including cost estimates for a test well investigation, if deemed feasible.

## **COST ESTIMATE**

The lump sum cost for HVV to perform the Phase 1 Hydrogeological Investigation, described in this proposal is \$4,320. The cost for the Phase 1 investigation is a fixed not to exceed cost based on the proposed scope of work.

Any additional work beyond the scope of this proposal and determined necessary as part of the investigation will be incorporated into our recommendations. Any such additional work would be invoiced at our standard rates plus expenses. No additional work will be conducted or invoiced without prior authorization from the Town. The cost estimate provided does not include any time or expenses for giving expert testimony or attending public meetings. Any such work will also be billed at our standard rates plus expenses.

Invoicing will be sent monthly for charges incurred during the month. All invoices are payable upon receipt.

The intent of this proposal has been to outline the proposed services, estimate costs and define HVV's invoicing procedures for the proposed hydrogeologic consulting services. If you select HVV to provide the proposed services and find the terms and conditions set forth acceptable, please issue a purchase order, or a letter of authorization, referring to this proposal. HVV will provide an agreement for services with full terms and conditions or complete the client's agreement.

Thank you for giving HVV the opportunity to be of service to your firm. If you have any questions about the services described in this proposal, or any other part of this proposal, please do not hesitate to contact me at (518) 371-7940 ext. 120.

Very truly yours,  
Hanson Van Vleet, PLLC.

**7. New Business**

**Subject**                                **6.7. Appointment of Zach Murphy as Zoning Board of Appeals Chair**

Meeting                                    July 6, 2026 - Monroe Town Board Meeting Agenda

Type                                        Action (Resolution)

Motion to accept the resignation of Chip Francis Postiglione as ZBA Chair, while maintaining his position as ZBA member, and accept his recommendation to formally elevate Zach Murphy to ZBA Chair.

"First and foremost, I would like to send my condolences to anyone who had the pleasure of knowing our Town Secretary, the fantastic Norinne McSweeney. She was a one-of-a-kind woman, and I will always be grateful for having known her.

Secondly, I would like to thank Chairman Postiglione for his determination and drive to help the community. Understandably things change in life and he will be stepping down as Chairman of the Zoning Board of Appeals.

With the loss of Ms. McSweeney and Chairman Postiglione stepping down I understand how the community may be concerned about the future of the Zoning Board. I would like to assure you all that we will get back to business as usual shortly, but we won't forget the positive impact these two made.

I would like to thank the current Town Supervisor Maureen Richardson for the opportunity to be the new Zoning Board of Appeals Chairman, a role that I do not take lightly. I would also like to thank the previous Town Supervisor Tony Cardone for giving me a chance to be on the Zoning Board nearly 4 years ago. Most importantly, I would like to thank the residents of the Town of Monroe for never giving up. This town is full of hard-working resilient Americans, and I plan on hearing and addressing every one of their concerns.

Thank You Monroe,  
Zachary Michael Murphy  
Town of Monroe Zoning Board of Appeals Chairman"
